Vladislav Belyaev

Frontend Developer

About me

I'm a Frontend Developer with more than 1.5 year of experience creating SPA using React, Redux, TypeScript and JavaScript. I'm currently studying React and Redux deeper. In free time I like to solve tasks on Codewars and improve my English skills. I'm open for new opportunities and open to relocating Europe.

TODO LIST
TODO LIST is an application where you can create list of tasks you should to do.
Stack: React / Redux / Typescript / Javascript / MaterialUI / Axios / React-Router-dom

SOCIAL NETWORK
This is an analogue of any social network that you know (VK, Facebook)
Stack: React / Redux / Typescript / Javascript / Axios / React Hook Form / React-Router-dom

TASK MANAGER (teamwork)
We've created an application, which you can help to manage your project, similar to the Jira application.
Stack: React / Redux / Typescript / Axios / MaterialUI / React Hook Form / React-Router-dom / i18next

RS LANG (teamwork)
We've created an analogue of the learning platform Lingualeo.
Stack: Typescript / JavaScript / HTML / SCSS / RestAPI / ESLint / Webpack

ASYNC RACE
Async Race is an application where you start a race and the cars start moving, there will be only 1 winner. During the race, any machine can break down. The server decides which machine to break down .
Stack: Typescript / JavaScript / HTML / SCSS / RestAPI / ESLint / Webpack
